3. The production plant is scheduled to manufacture tubes of all kinds in series, also molybdenum and wolfram wires for cathodes, as well as coils, meter, and resonance frequency meters. New directives for the 1943 research and development program at the Oberspreewerke are expected to be given by Moscow. Hence, the present program is not binding.
4. A secret experimental plant in Karlshorst, which has assignments similar to those of the Oberspreewerk, has been working for some time within the SMA compound. Paravicini, a former engineering Major in the German Air Force, is in charge of this enterprise. Paravicini was a member of the Nazi party.
